

# There's More to Explore with Audubon Adventures

Available now for traditional in-person classroom teaching, hybrid school-home teaching, and homeschooling.

For grades 3-5

NEW FOR 2020-21

## “NATURE’S CONNECTIONS: WATER, PLANTS, AND CLIMATE”

**Caretaking Our World’s Water.** Clean fresh water is a limited natural resource that supports life on Earth. Conserving and protecting it benefits all living things—birds, other wildlife, and people, too.

**Plants Are for the Birds!** Native plants have what native birds and other wildlife need, and they require less attention from people to thrive in their natural habitat.

**Let’s Change Climate Change.** The more we understand climate change, the more everyone, including young people, can take action to protect birds, other wildlife, and all living things on Planet Earth.

### KITS INCLUDE ...

#### Traditional classroom or hybrid kit

- 32 printed copies of each of three student magazines

#### Homeschool kit

- 1 printed copy of each of three student magazines
